## Stay cool in the Territory

### Air Conditioning

Window wall systems or single air conditioning units may do for one particular room in your home, but if you have a large area to cover and you want even coverage of cooling air throughout, you can't go past a split air conditioning system. Not only do they tend to be more efficient for domestic households but are also quieter indoors during operation.

#### Advantages of split system air conditioning:

- flexible in size and don't take up floor space
- simple and effective
- easier to install than other systems
- even distribution of air
- save money and be greener

Jetstream Electrical can provide you with properly installed and extensively tested air conditioning. Beware of any installers who want to install their systems in under 3 hours—they may not be properly tested and may leak greenhouse gases. So let Jetstream Electrical cool you and your family and enjoy the territory lifestyle.

## The future within your reach

### C-Bus Automation

Enhance your lifestyle with smart home automation. Integrate all the electrical devices in your house with each other and telecontrol them conveniently and securely from the control panel, a personal computer or even over the internet. Home automation can also improve the quality of life for persons who might otherwise require caregivers or institutional care.

Clipsal home automation control panel

#### A few things that can be centralised and automated with a C-Bus System are:

- lighting controls
- ventilation and air conditioning
- houseplant and yard watering
- home entertainment systems
- domestic robots

Jetstream Electrical is an approved and accredited Clipsal C-Bus installer. We have a team of dedicated system designers, programmers and technicians who are ready to design and install your next C-Bus system. So get ready for the future.

## Your mobile is a remote control

### GSM Technology

GSM Units connect to the mobile phone network and can thereby operate and monitor almost any device like a wireless remote control. Combine a GSM unit with a CCTV digital video recording unit and monitor your premises via iPhone or PC and feel more secure while you are away.

#### Electrical devices a GSM unit can control:

- Roller Doors
- Electric Gates
- Motors
- Air-Conditioners
- Lights
- Power Outlets
- Door Locks
- Arcade Gaming Machines
- Computer Servers

#### Features:

- authorised caller database
- no call charges
- weatherproof and UV-resistant enclosures
- 240v and 12v units and solar kits available
- 12 months warranty

Jetstream Electrical has been a leader in installing, programming and commissioning this technology for many years. With GSM technology changing and evolving everyday the cost of equipment has dropped significantly and can now be offered to the domestic market at an affordable price—let a GSM unit make life just a little easier.
