

## GSM Unit Applications

### Scenarios

**GSM relays have been fitted and adapted to solve the following scenarios:**

Roller door and electric gate situated on a busy road with no time to wait for a remote control hand piece to come into range. A GSM unit was fitted allowing the gate to be opened one minute prior to arriving.

GSM units are fitted to warehouse gates and roller doors to allow remote access to unmanned warehouses for distribution or tradesmen workshops. In most cases access is granted for well-known regular deliver drivers where security is not an issue. In other cases we also install CCTV to suit the application and enable remote monitoring via iPhone or PC.

GSM units are installed to reset computer servers by a simple phone call or text to save a trip to the office after hours or on weekends.

Arcade machines produce several hundreds of dollars a day turn over and if the machine has a fault the owner or operators would like to know about it when the fault occurs. With the help of a GSM unit a text message is sent stating the fault is present allowing quick and prompt repair to rectify the machine.

**With technology changing everyday we at Jetstream Electrical employ a dedicated team of professionals who are ready to solve *your* next cutting edge GSM solution.**

Jetstream Electrical services all areas of the electrical and data fields with emphasis on meeting changing demands. Our goal is to service all aspects of our customers business. The first time, every time. Your business is our first priority.

## GSM Unit Abilities

GSM Units connect to the mobile phone network and can thereby operate and monitor almost any device like a wireless remote control.

### Control and Monitor

**A GSM unit can control almost every electrical device:**

- Roller Doors
- Electric Gates
- Motors
- Vending Machines
- Air-Conditioners
- Lights
- Power Outlets
- Door Locks
- Arcade Gaming Machines
- Reset Computer Servers

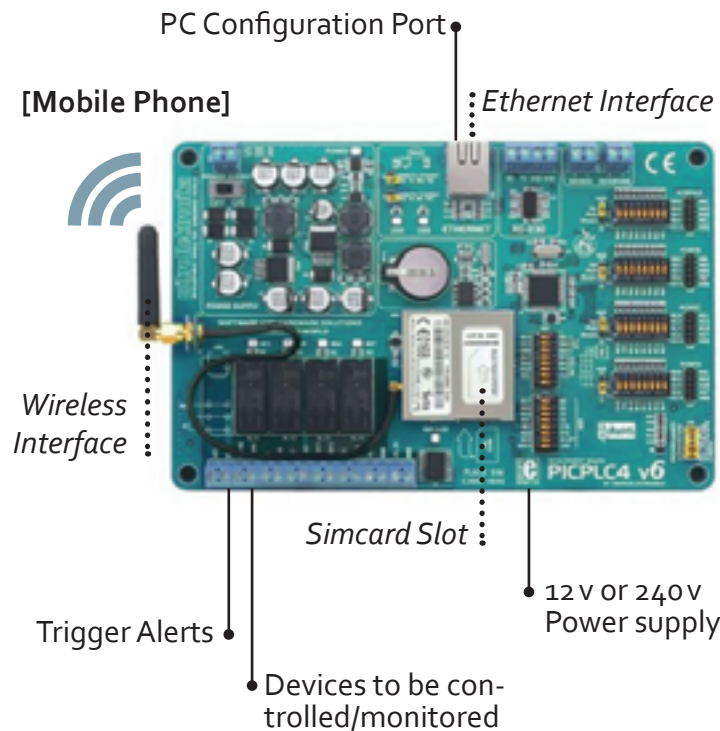

**GSM units can also send you an SMS if:**

- A pump has stopped
- Mains power has dropped off
- The garage door is open
- A bore pump has tripped out
- A vending machine is out of stock
- A motion sensor is triggered
- The water tank level is low
- A door is opened or closed
- An arcade machine has a fault
- An electrical device has tripped out

## Affordable Price

Jetstream Electrical has been a leader in installing, programming and commissioning this technology for many years. Due to the high cost outlay for parts alone these devices have been shelter from the day to day market and featured predominantly in specific applications. But with GSM technology changing & evolving every day the cost of equipment needed to control an electrical device has dropped.

**GSM technology can now be offered to the domestic market at an affordable price—let a GSM unit make life just a little easier.**

## Ease Of Use

**Features:**

- Authorised caller database
- No call charges
- Unknown callers ignored
- Safe and Secure
- Database can be updated by sms
- Simple and compact design
- Weatherproof & UV-resistant enclosures
- 240 v and 12 v units available
- Solar kits available
- Digital inputs for various monitoring applications
- Call or sms commands to activate
- 12 months warranty

### Remote Camera Monitoring

To get the full functionality combine a GSM unit & CCTV Digital video recording unit. It's simple and quick to monitor via iPhone or PC, 24hr recording or motion enabled.

**Remote Camera Monitoring will give you extra security in situations like these:**

- You are away for a few days and apart from being able to turn on and off different lights throughout the premises you want to keep an eagle eye on your property.
- You want to let tradesmen in while you are busy at work or just running late.
- You are out of the office or warehouse and have a deliver driver waiting at your door step to deliver a parcel.

**Call Jetstream Electrical for your complete technology solutions.**
